

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Freshly retired, after spending numerous years working with his brother to build their crane business into an industry leader, John had no idea that fatefull trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

All through their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could swiftly and safely elevate people in the air to accomplish upkeep and other building services.

Following their return from vacation, John set up a business with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into quite a few global marketplaces and continues to cultivate innovative equipment to guarantee that consumers are able to become safer and more well-organized within their workplace.
